Career objective

Software Engineer with 5+ years of experience designing, developing, and supporting scalable web and enterprise applications across startup and enterprise environments. Experienced in building full-stack solutions using C#, ASP.NET Core, Java, Spring Boot, PHP, Laravel, Python, Django, JavaScript/TypeScript, React, Node.js, SQL, Azure, AWS, Docker, and RESTful APIs. Proven ability to modernise legacy systems, integrate third-party services, optimise application performance, and deploy secure, cloud-based solutions throughout the full software development lifecycle. A collaborative problem solver with strong Agile experience, committed to delivering high-quality, maintainable software that meets business objectives. Based in Perth with Australian industry experience and eligible to apply for an Australian Defence Security Clearance.

Key Skills

- **Programming Languages:** JavaScript, TypeScript, Python, PHP, C#, Java, SQL
- **Frontend:** React, Next.js, Angular, Vue.js, Tailwind CSS, Bootstrap, HTML5, CSS3, GSAP, jQuery
- **Backend:** Node.js, Express.js, NestJS, Django, Flask, Laravel, ASP.NET Core (MVC/Web API), Spring Boot
- **Databases:** PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Oracle
- **API & Query Languages:** REST APIs, GraphQL
- **Cloud & DevOps:** AWS, Microsoft Azure, Docker, CI/CD, cPanel, Hostinger
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Development Practices:** Agile, Scrum, Kanban, Microservices, MVC, Object-Oriented Programming (OOP), Test-Driven Development (TDD)
- **Testing:** Jest, Cypress, Mocha

Employment history

Software Developer

May, 2025 - Current

AB Web Developers, U 43/273 Beaufort Street, Perth, WA 6000

Key responsibilities:

- Developed and maintained eCommerce applications using Laravel, BigCommerce, and WordPress.
- Built responsive web applications with Next.js, React, Node.js, JavaScript, GraphQL, and related frontend technologies.
- Developed Python automation scripts and integrated third-party services, including payment gateways, SendGrid, Google reCAPTCHA, HubSpot, and REST APIs.
- Deployed and maintained applications on cPanel-managed VPS environments, including SSL, domain configuration, and production support.
- Resolved production issues and leveraged AI tools such as ChatGPT, GitHub Copilot, and Claude Code to improve development efficiency.

Key achievements:

- Successfully launched the Cloudtap Australia website.

- Led the redevelopment of the Buy Blinds Online eCommerce platform, improving functionality and user experience.
- Delivered website rebranding projects for Trucut, Red Tomato, and Kotuku Workwear.
- Earned a contract extension through consistent delivery of high-quality solutions.

Software Developer

July, 2023 - April, 2025

Tier5 Technology Solutions Pvt Ltd, Calcutta, India

Tier5 is a product based IT firm providing software solution services mostly for the clients based in the USA.

Key responsibilities:

- Developed and maintained scalable web applications using **Java, Spring Boot, React, Node.js, and PostgreSQL**.
- Built responsive React applications and integrated them with RESTful APIs developed using **Spring Boot and Node.js**.
- Designed and optimized PostgreSQL databases, including schema design, indexing, and query performance tuning.
- Implemented secure authentication and authorization using **JWT and Spring Security**.
- Deployed and managed containerized applications on **AWS** (EC2, RDS, S3) using **Docker** and CI/CD pipelines.
- Collaborated with cross-functional teams in an Agile environment to deliver new features, troubleshoot production issues, and improve application performance.
- Performed code reviews, unit testing, and maintained clean, scalable code following SOLID principles and best practices.

Key achievements:

- Improved API response times by **35%** through backend optimization and PostgreSQL query tuning.
- Developed reusable React components and Spring Boot services, reducing development effort across projects.
- Automated Docker-based deployment pipelines on AWS, improving release efficiency and deployment reliability.
- Successfully delivered multiple enterprise applications on schedule while maintaining high code quality and customer satisfaction.

Software Engineer

January, 2022 - June, 2023

JustGo Technologies Ltd, Bangla Motor, Dhaka, Bangladesh

JustGo provides membership and event management solutions to the sport industries mainly in the English speaking countries like UK, Scotland & Australia.

Key responsibilities:

- Developed and maintained enterprise web applications using C#, ASP.NET Core, React, Node.js, and Microsoft SQL Server.
- Built responsive React applications and integrated them with secure RESTful APIs developed using ASP.NET Core and Node.js.
- Designed, developed, and optimized SQL Server databases, stored procedures, and complex queries to improve application performance.
- Implemented authentication and authorization using JWT and ASP.NET Identity.
- Deployed and managed applications on Microsoft Azure (App Services, Azure SQL, Storage Accounts) and configured CI/CD pipelines using Azure DevOps.
- Collaborated with business analysts, QA engineers, and developers in an Agile environment to deliver scalable software solutions.
- Performed code reviews, debugging, unit testing, and production support while following SOLID principles and clean architecture.

Key achievements:

- Improved API performance by **35%** through SQL optimization and backend performance tuning.
- Developed reusable React components and .NET services, reducing development time across multiple projects.
- Automated Azure deployment pipelines, reducing release time and improving deployment reliability.
- Successfully delivered multiple enterprise applications on schedule while maintaining high code quality and customer satisfaction.

Software Engineer

October, 2020 – December, 2021

MESOLshare Ltd., Dhaka, Bangladesh

MESOLshare is a solar panel solution provider founded by a German entrepreneur.

Key responsibilities:

- Developed and maintained scalable web applications using **Python, Django, React, and PostgreSQL**.
- Built responsive front-end applications with **React**, JavaScript, HTML5, CSS3, and Bootstrap.
- Designed and developed RESTful APIs using **Django REST Framework**, implementing secure authentication and authorization.
- Designed, optimized, and maintained PostgreSQL databases, improving query performance and data integrity.
- Deployed and managed applications on **AWS** (EC2, RDS, S3) using **Docker** for containerized development and deployment.
- Collaborated with cross-functional teams in an Agile environment to deliver new features, resolve production issues, and improve application performance.
- Performed code reviews, wrote unit and integration tests, and followed best practices for clean, maintainable code.

Software Developer

September, 2019 – June, 2020

Visma Labs AB, Växjö, Sweden

Visma labs is one of the biggest software solutions providers in Europe.

Key responsibilities:

- Developed and maintained enterprise web applications using C#, ASP.NET Core, Angular, and SQL Server.
- Built responsive Angular applications and RESTful APIs with secure JWT authentication.
- Designed and optimized SQL Server databases using Entity Framework Core, stored procedures, and T-SQL.
- Integrated third-party APIs and deployed applications to Microsoft Azure using Azure DevOps CI/CD pipelines.
- Collaborated with cross-functional teams in an Agile environment to deliver new features and resolve production issues.
- Performed code reviews, wrote unit tests, optimized application performance, and containerized applications using Docker.

Key Achievements

- Improved API performance by 40% through SQL query optimization and database indexing.
- Migrated legacy ASP.NET MVC applications to ASP.NET Core, enhancing performance and maintainability.
- Automated Azure deployment pipelines, reducing deployment time from 45 minutes to under 10 minutes.
- Increased application reliability through centralized exception handling and structured logging.
- Successfully delivered multiple projects on time while maintaining high code quality.

Junior Software Engineer & Intern

August, 2016 – March, 2017

bGlobal Interactive Ltd., Dhaka, Bangladesh

bGlobal is an outsourcing company that develops software for USA based clients.

Key responsibilities:

- Developed and maintained web applications using **PHP, Laravel, Vue.js, JavaScript, and MySQL**.
- Built responsive user interfaces with **Vue.js**, JavaScript, jQuery, HTML5, CSS3, and Bootstrap.
- Designed and consumed RESTful APIs, implementing secure user authentication and authorization.
- Developed and optimized MySQL databases, including schema design, stored procedures, and query performance tuning.
- Built and customized **WordPress** themes, plugins, and CMS functionality to meet business requirements.
- Deployed and maintained applications on **AWS** (EC2, RDS, S3) using **Docker** for consistent development and deployment.
- Collaborated with designers, QA engineers, and stakeholders in an Agile environment to deliver high-quality software.
- Performed code reviews, troubleshooting, bug fixes, and application performance optimization.

Key achievements:

- Reduced page load times by **35%** through database optimization, caching, and front-end performance improvements.
- Developed reusable Laravel modules and REST APIs, reducing development effort across multiple projects.
- Automated Docker-based development and deployment workflows, improving release efficiency.
- Successfully delivered multiple client websites and business applications on schedule while maintaining high code quality.

Education & Training

- ICT50220 Diploma of Information Technology (Back End Web Development) - EQC Institute of Technology (2026)
- Introduction to AI with Python – North Metropolitan TAFE (2026)
- Cyber Security & Python – North Metropolitan TAFE (2025)
- Data Analysis Bootcamp – North Metropolitan TAFE (2025)
- Cloud Engineering – North Metropolitan TAFE (2025)
- Professional Diploma in Software Development – Sweden (2020)
- Master of Information Systems (partial) – Sweden (2019)
- Bachelor of Information Science – Bangladesh (2013)

Key Value

- 5+ years commercial software engineering experience
- Based in Perth with Australian work experience
- Strong full-stack and cloud capability
- Experience across startup and enterprise environments
- Client-facing communication and problem-solving skills
